

Reports on '*On a conjecture of H. Gupta*' by E. Lecouturier and D. Zmiaikou

**REFEREE 1:**

"Overall, this paper provides a very good proof of an old and difficult result. The key lemmas, Lemmas 1 and 2, are very insightful."

**REFEREE 2:**

"This is a nice paper answering an old question of Gupta, suitable for publication in Discrete Mathematics. Very simple constructions are provided with proofs that are reasonably short based on an interesting encoding of the problems and a related lemma."
